Career Objective

Final-year B.Tech (AIML) student with strong proficiency in software development, object-oriented programming and database management. Skilled in designing and building scalable applications, full-stack development, and integrating APIs. Experienced in collaborating within agile teams and contributing to the development of AI-driven and data-centric solutions.

Skills

- Programming: Python, C, Java
- Web Development: Django, React, Fast API
- Databases: MongoDB
- Frameworks & Tools: API Integration, Python Modules, Figma
- Machine Learning & AI: Machine Learning, Artificial Intelligence, Gen AI, Prompt Engineering, Agent AI, MCP, LLM
- Concepts: Model Development, Feature Engineering, REST API Integration
- Soft Skills: Mentoring, Content Writing, Teamwork, Adaptability

Education

Degree	Institute/Board	CGPA/Percentage	Year
B.Tech (AIML)	SNS College of Technology, Coimbatore	8.24 (Current)	2022-2026
Secondary	Sri Vijay Vidyalaya Matric Higher Secondary School	83.16%	2022
Secondary	Sri Vijay Vidyalaya Matric Higher Secondary School	85.80%	2020

Internship Experience

Android App Development Intern – Cognifyz (Mar 2024 – Apr 2024)

- Developed an Android application using Java/Kotlin in Android Studio with features like authentication, REST API integration, and storage. Focused on user-friendly interfaces following Material Design principles to enhance usability.

Machine Learning Intern – Mindnotix (Jul 2024 – Aug 2024)

- Built machine learning models using Python with Scikit-Learn and TensorFlow for data analysis and predictions.
- Worked on feature engineering, model optimization, and evaluation to improve accuracy and performance.

AI/GenAI Intern – SNS iHub (Sep 2024 – Dec 2024)

- Contributed to a real-time client project involving Generative AI and Python for AI model deployment.
- Gained hands-on experience in real-time data integration and deploying AI-driven solutions.

Projects

Stock Price Prediction – LSTM (2024)

- Developed a stock price prediction model using LSTM networks to analyze historical data and forecast future trends. It focused on feature selection and optimization, with performance evaluated using metrics such as MAE.

Air Quality Prediction (2023)

- Built a machine learning model to predict air quality by analyzing historical pollution data. Implemented preprocessing techniques, feature selection, and accuracy evaluation to enhance prediction performance.

PARKNXT – Smart Parking System (2023)

- Designed a real-time smart parking system integrating sensors and IoT data to track space availability. Implemented features such as reservation, occupancy monitoring, and app-based navigation to improve user convenience and parking efficiency.

Patient Health Assist (2022)

- Developed a mobile application to assist patients in managing medication schedules with customizable reminders and tracking. Enhanced usability by adding features like health tips, daily alerts, and medication logs to support consistent treatment routines.

Certificates

- Microsoft Azure AI-Fundamentals
- Database Management System – Infosys Springboard (2024)
- Cloud Practitioner Essentials – AWS (2024)
- Generative AI in Real-World Cases – AWS (2022)
- GenAI Powered Data Analytics – TATA Forage (2023)
- Patent Published – PARKNXT

Workshop

- End-to-End Machine Learning: From Data to Prediction
- Building Intelligent Applications with Generative AI and API Integration
